

The British Science Week 2023 poster competition

British Science Week 2023 is fast approaching – **10th -19th March** and we would like everyone to take part, starting with a poster competition.

If you would like to take part, design your poster and return to your class teacher after half term.

The theme this year is 'Connections', so there are loads of STEM topics that could be explored! How about exploring how our body parts are all connected and work together, the connection between our actions and the impact on our environment, or even how internet connection has changed the world. We can find examples of connections within all subjects and all around us, making it an excellent starting point for the science week.

On the back of this page you will find space to create your poster.

Please fill in your details and return to your class teacher before 10th March, so that we can display them around school during Science week.

Happy Half Term.

Mrs Clarke-Pitcher.
