LO: I can represent doubles.

Fluency

Grow to twenty and back again.

Doubles and halves competition.
How many can you say correctly in 1 min?

I have a recipe for fruit salad that I am going to make to take to a party.

I have a problem. I have bought too much fruit, so I will need to halve my recipe.

Here is my recipe:

2 oranges	4 bananas	10 apples	8 pears	6 strawberries
				

Can you help me create a shopping list with the correct amount of fruit to halve my recipe?
