How many altogether ?

Today we are going to
use a part part whole diagram
for our addition .

How many altogether ?

Use small objects such toy cars, small figures etc to use for the amounts in your part part whole diagram .

How many altogether ?

2 + 1 = 3

Put 2 objects in one part and
1 object in another part.
Move them into the whole (the large circle)
to find how many altogether.

How many altogether ?

Complete the addition calculations
below using your part part whole diagram.

5 + 3 =

3 + 6 =

9 + 1 =

4 + 4 =
