When you are online to be safe: do not share your address or personal information like your or parent's bank details or phone number. Also if you're on a social media app check if you are on private settings so random people don't stalk you. People can find out where you live and be carefully on what you send or post on social media.

please turn over.

RAP

Don't get yourself in a right old mess, Stay safe from the internet. Don't talk to people you don't know, Or you will be in big trouble. Never go and block someone online, Or you'll be a bully. Be really safe like Jesus in a manger, Don't do anything without permission.

When you're in the classroom or at home, make sure no one calls you on your phone. giving your number is a big NO! NO! NO!

RTO!
