

THE ART OF ANCIENT ROME

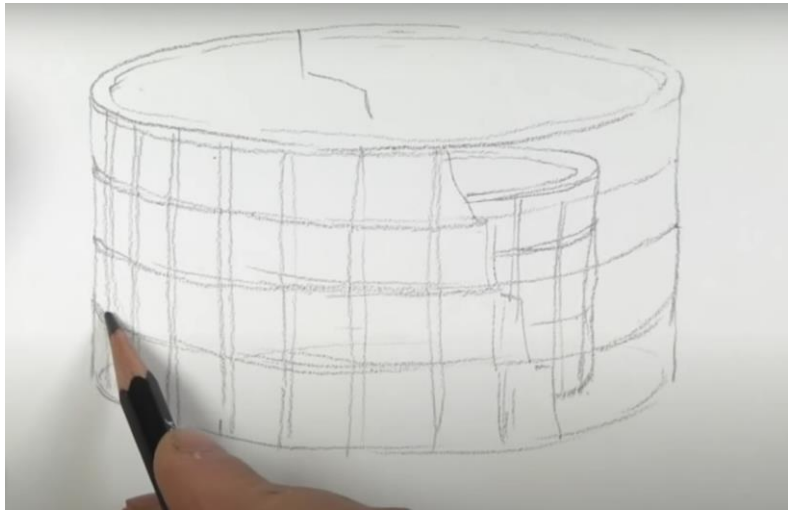

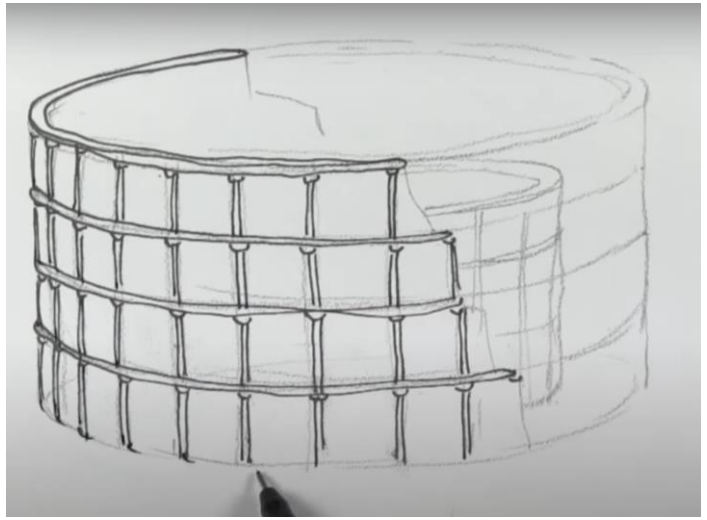

Draw the Colosseum

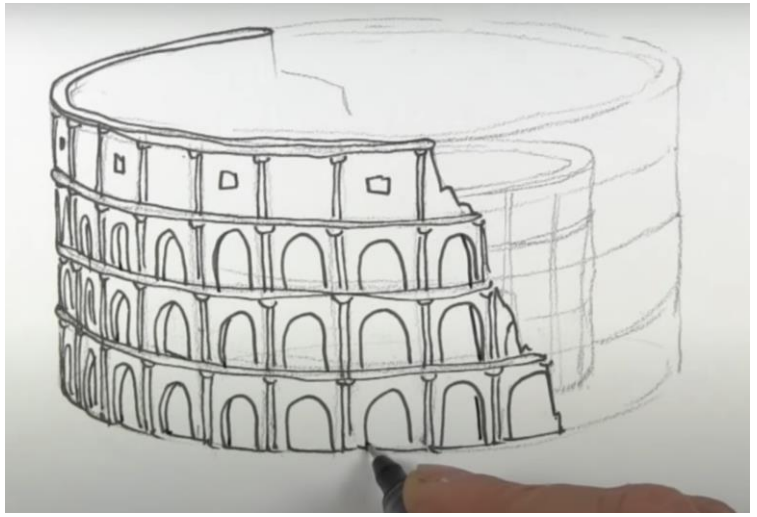

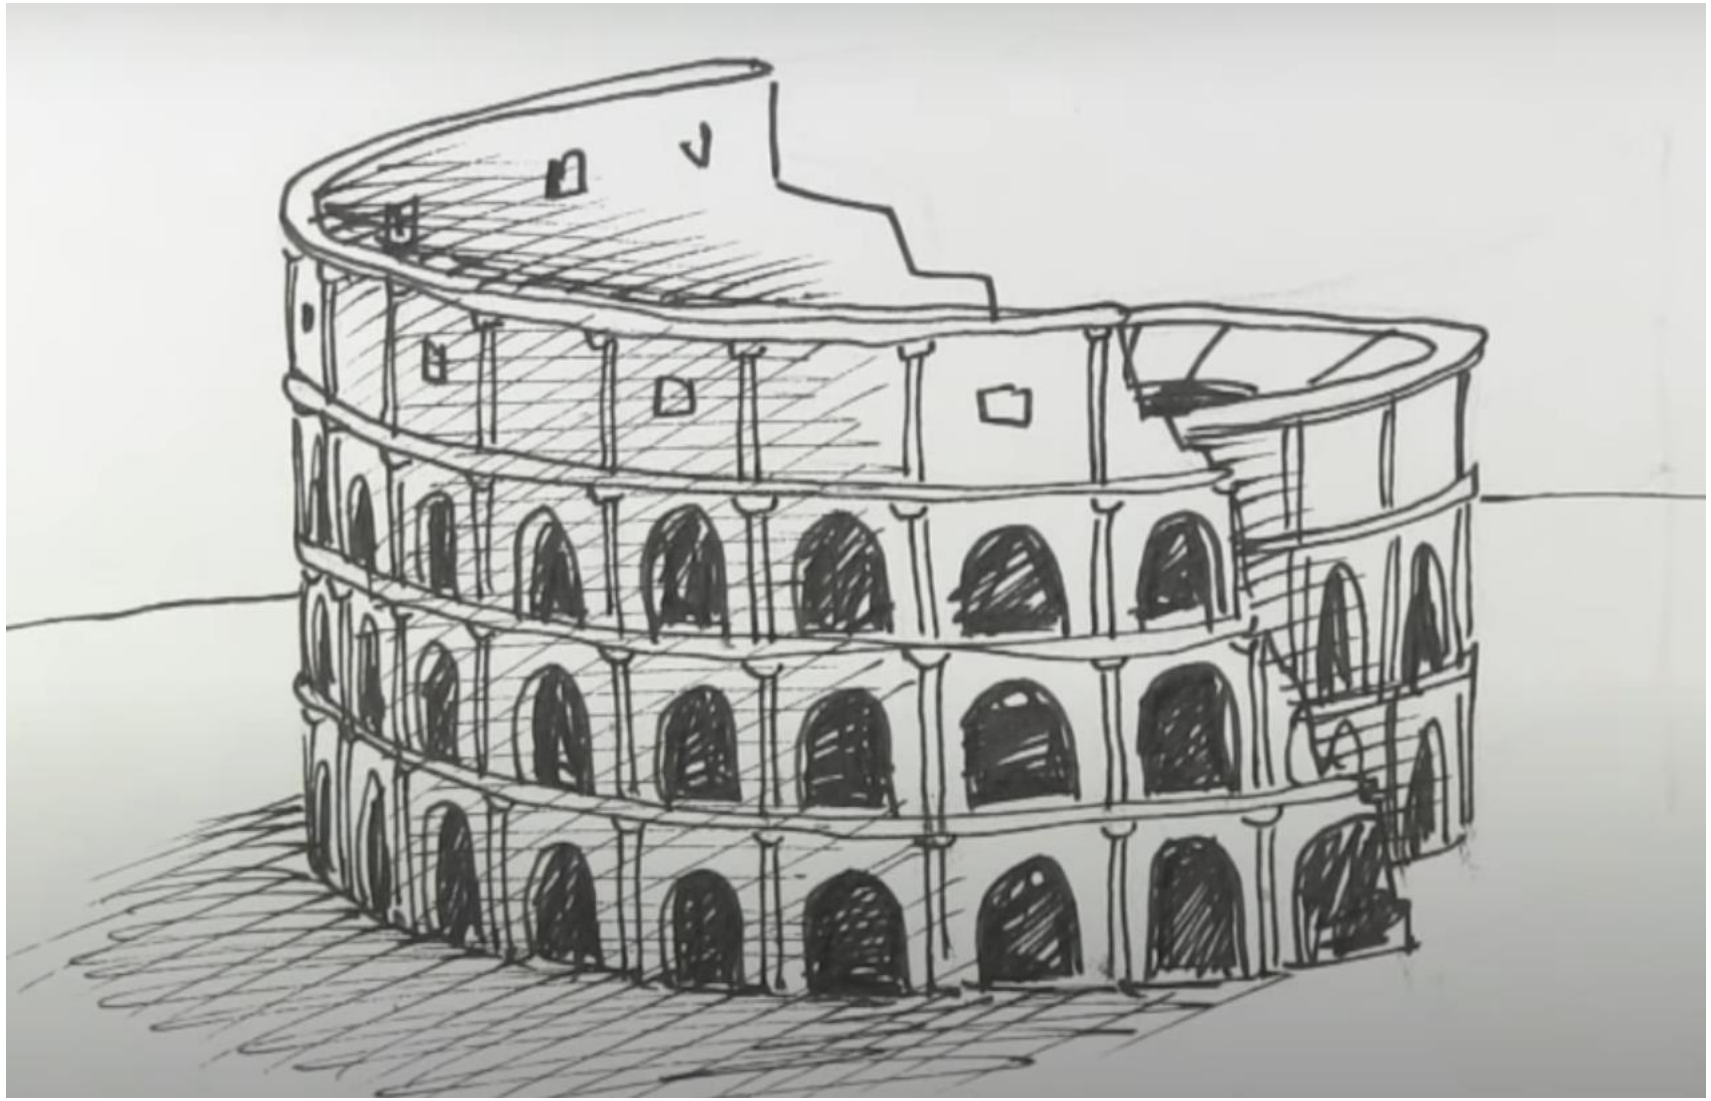

HOW TO MAKE A MOSAIC

For children's mosaics, you can easily recycle some materials at home?
You can make a simple mosaic with paper, glue, and cut up magazines
Before you start, be sure to protect surfaces and clothes.

YOU WILL NEED:

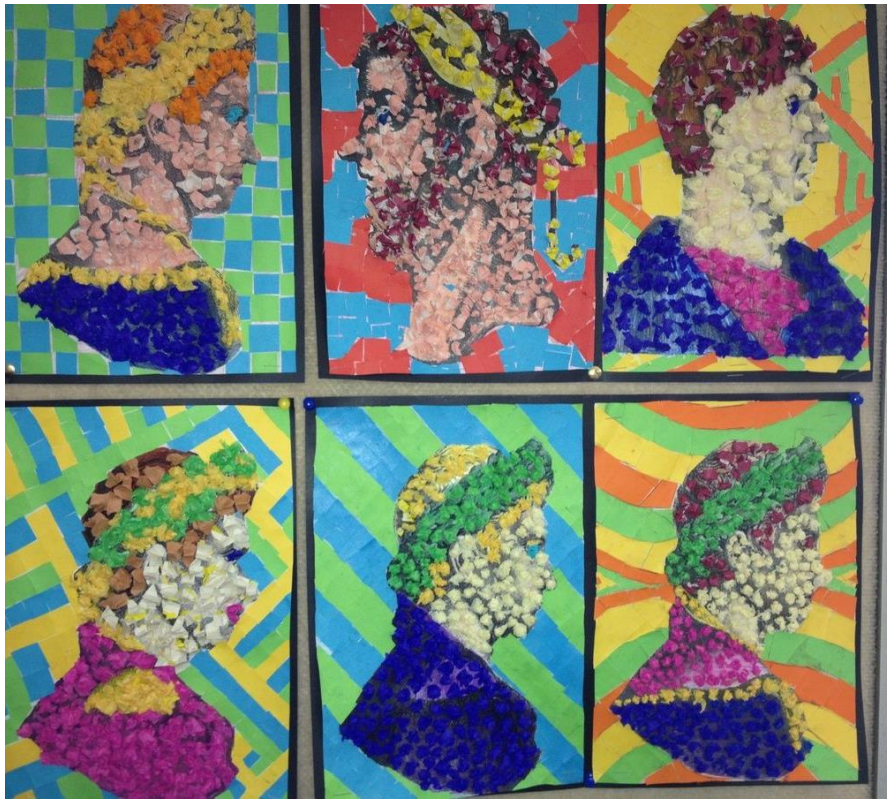

- Glossy magazines
- Containers
- Scissors
- Glue
- A sheet of white paper
- A pencil

INSTRUCTIONS:

Go through the magazines and tear out any large sections of coloured paper.
Cut the paper into strips and then squares.
Organise the paper squares into containers or plates of different colours.
Draw the 'broad strokes' of your chosen design on the sheet of white paper.
Start filling in the design with the coloured 'tiles' of paper glued end to end with small white gaps left in between.
