Year 2 – Lesson 2

Drawing Faces Accurately

What do we already know?

A portrait is a piece of art work showing a person and can show you what a person looks like, their thoughts and feelings and their personality or status.

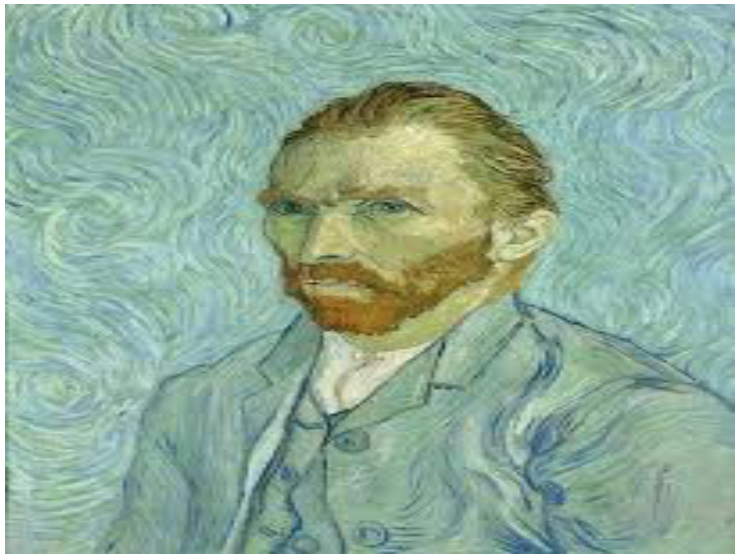

What do we already know?

- A self portrait is a portrait an artist produces of themselves.

Prior Learning Assessment Task

- Look at yourself in a mirror and draw what you look like.

What are we learning?

<u>We are going to:</u>

- To understand how an artist can plan a portrait.

<u>We will need:</u>

- Mirrors
- Paper
- pencils

Words we need to know…

- facial features
- eyes
- nose
- mouth
- ears

What do you think these words mean?

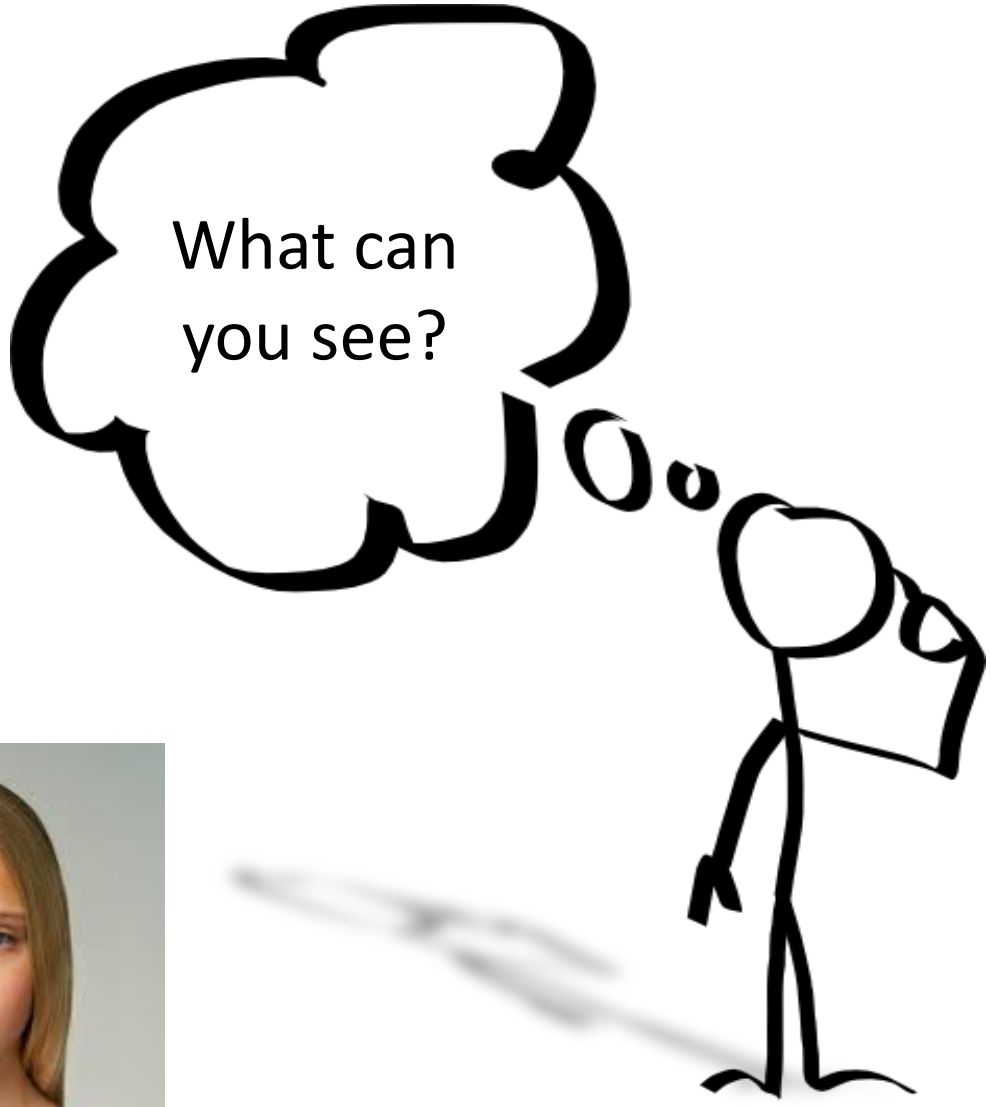

Talk Task

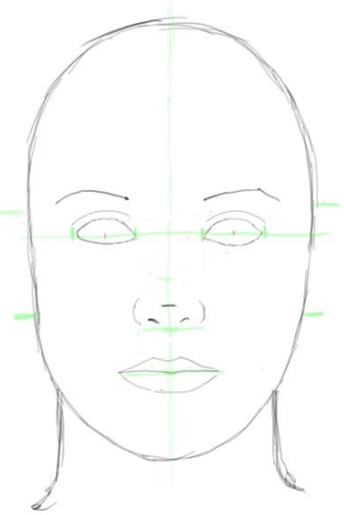

Study your partner's face.

- How far down their head are their eyes?
- How far down their head are their ears?
- What about their nose?
- What about their mouth?

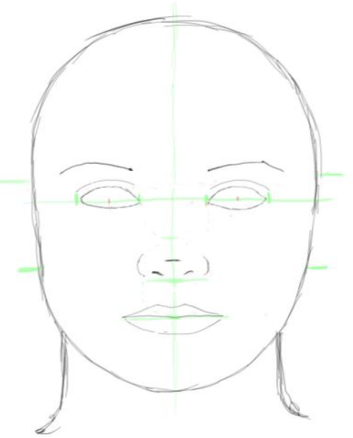

Task- to follow instructions to plan drawing a face

- Draw an oval or egg shape that fills the paper.
- Draw a straight line across, about half way down the face-this indicates where the eyes will be.
- Draw a line about half way between the eyeline and bottom of the chin-this will be the bottom of the nose.
- Draw a line about half way between the nose line and the chin-this indicates where the mouth will be.

- Draw a line right down the centre of the head, top to bottom-this makes sure. The face is drawn symmetrically and not lopsided.

- Draw two lines to indicate the neck.

- Draw two small lines on either side of the head just below the eye line-this shows where the ears will go.

Challenge

Compare the drawings from the beginning of the lesson and the plan for the self portrait. How are they different?
